

*Lano Carpets' Mineral has been designed for the bathroom*

## • Water off Lano's back

Minerals is a frisé cotton look deep pile 100% polyamide, waffle backed carpet developed for the bathroom. Specially engineered to tolerate the attack of water and moisture, the range is also available in a two-metre width to ensure minimum wastage in this traditionally smaller room of the home.

With nine colourways reflecting the latest bathroom trends, the carpet has the additional benefit of Scotchgard protection. In addition, Lano Carpets also produces the carpet on a secondary backing in a four-metre width to allow homeowners to create a seamless transition between bathroom and bedroom.

Francis Debrabandere, export manager for Lano explained: 'For some, only carpet will suffice in the bathroom and obviously a standard carpet will not stand the constant abuse of moisture.'

'We extensively researched the best combination of backing and fibre to ensure the durability of Mineral within this environment and the addition of Scotchgard protector just helps to underline its suitability for the bathroom.'
