

Lano Flooring Solutions' Sentinel IB stands guard

With a growing level of soft contract work being carried out in schools, care facilities and residential homes, Lano Flooring Solutions has released Sentinel IB to ensure that these facilities' needs can be met by a performance soft floor solution.

Designed to cater for the rigorous maintenance demands of these sectors, where spills and tracked-in dirt are frequent and immediate clearance is not always possible, Sentinel IB makes the most of solution dyed fibres to ensure that the use of strong cleaning chemicals and the spills themselves do not adversely affect the looks of the carpet. Add to this an impervious secondary backing, that hinders water damage to the carpet and Sentinel IB really is designed for the demanding needs of even the busiest residential care facility.

Manufactured from 90% polypropylene and 10% polyamide, Sentinel IB's loop pile construction also has the wear performance and durability to cope with use in school classrooms, patient bedrooms and even dining areas.

With eight colourways designed to provide a backdrop for differing styles of fixtures and furniture, Sentinel IB provides an ideal platform for complete refurbishments, yet is equally adept at blending in to an existing scheme when the previous floor covering has gone beyond its best.

The multi-loop texture of Sentinel IB ensures maximum aesthetic impact as well as excellent performance as Francis Debrabandere, UK Sales Manager explains:

"While performance does come first in the demanding healthcare and education sectors this does not mean that aesthetics have to be compromised and we have proved this with Sentinel IB. The multi-level loop pile provides texture and visual interest and with carefully chosen colourways, Sentinel IB will look great in any setting, be it residential home, school or care facility."
