

## Minerva

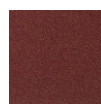

La moquette in poliammide, conosciuta per la sua resistenza, può essere usata in qualsiasi ambiente. Uno dei suoi maggiori vantaggi è che le sue fibre resistono a lungo all'usura. Questa qualità rende particolarmente indicato l'utilizzo di moquette in nylon in zone soggette a frequente passaggio pedonale; infatti le fibre sintetiche resistono per molto più tempo rispetto alle altre fibre. Di conseguenza, le moquette in poliammide mantengono un aspetto "come nuovo" per molti più anni delle altre moquettes.

### SPECIFICHE

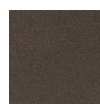

|                           |                                      |
